EDUCATION

University of California, Berkeley

Aug 2023 - May 2027

Bachelor of Science, Electrical Engineering and Computer Science — GPA: 3.765

Berkeley, CA

Officer, Cybersecurity Club | Eta Kappa Nu | Teaching Intern, CS61B Data Structures

EXPERIENCE

Software Engineer Intern

May 2026 – Aug 2026

Google

San Francisco, CA

- Designed and engineered a scalable benchmarking framework in **Go** for AI supply chain vulnerability scanners
- Orchestrated concurrent evaluations across up to **10k** AI skills with Cloud Run and Artifact Registry
- Established a golden dataset to continuously validate the accuracy of security scanners

Machine Learning Engineer Intern

Sep 2025 – Dec 2025

Scam AI

Berkeley, CA

- Built automated model pipelines with **PyTorch** to label **200k+** face images with demographic attributes
- Researched and optimized model evaluations for deepfake swap experiments with similarity metrics

Software Engineer Intern

May 2025 – Aug 2025

Bkey

San Francisco, CA

- Developed mobile app with **Flutter** and ExpressJS + MongoDB backend and RPC proxy
- Built a liveness detection WebAuthn + JWT authentication system, reducing login latency by **~65%**
- Deployed custom ERC-20 tokens and bridge contracts with automated self-custodial wallet generation

Software Engineer Intern

Jan 2025 – May 2025

ChannelSeal

Berkeley, CA

- Engineered multi-tenant **Java** Spring Boot REST APIs with Jakarta/JPA + **PostgreSQL**
- Built microservices and CRUD operations, implementing pagination & soft-delete
- Automated discovery of **200+** third-party OpenAPI specs with **Python** and Azure OpenAI

PROJECTS

CalFuel | Python, JS, Firebase, Google Cloud

Nov 2023 – Present

- Deployed a full-stack web app with Flask + GCloud to provide nutrition logging at **10+** campus dining halls/cafes
- Used by over **1100 students** to calculate and track their nutrient intake transparently

OCF Secure Web | Docker, Python, Linux

Sep 2025 – Dec 2025

- Led a security project with **7 members** to protect **950+** student org websites hosted by the OCF
- Developed infra + software to detect malware with signature detection, log aggregation, and network metrics

Angelus | OpenCV, Express, Flask

Oct 2025

- Developed full camera-to-music pipeline that uses live webcam data, Spotify data, and prompt generation
- Engineered WebRTC streaming and Python backend with MediaPipe emotion/head-motion models

CERTIFICATIONS/HONORS

The Gates Scholarship (1 of 750 national scholars, full ride scholarship)

GIAC Security Essentials & CompTia Linux+

National Cyber Scholar with Honors (top **2%** of CyberStart players nationwide)

National Cyber Challenge Finalist (One of 15 national finalists in CTF)

US Cyber Combine Athlete

TECHNICAL SKILLS

Programming Languages: Python, Java, C, Go, Rust, Swift, x86, SQL, PHP, Powershell, JS/TS, HTML/CSS

Security: Reverse engineering, SQLi, XSS, Web Exploit, Forensics, Pwn, Cryptography, AI injection

Frameworks: React, Django, Flask, Express, NodeJS, Flutter, REST, Spring, Networking

Software: Git, Docker, VS Code, IntelliJ, AWS, Linux, gdb, Ghidra, BurpSuite, Wireshark, Metasploit

Courses: Data Structures, Algorithms, Computer Security, Microelectronic Devices, PCB Design
